Parameters

Try it out

Name Description

data * required

object

(body)

Example Value | Model

```

Data {
  data* {
    [DataItem {
      store*
      forecast_date*
      forecast*
    }
  ]
}

DataItem {
  store*
  forecast_date*
  forecast*
}

Forecast {
  sku*
  sales_units*
}

ForecastPoint {
  date*
  value*
}

string
title: Store
minLength: 1
string($date)
title: Forecast date
string
title: Sku
minLength: 1
string($date)
title: Дата
integer
title: Значение

```

version * required

string

(path)

version

Responses

Response content type

application/json

Code Description

201

Example Value | Model

```
Data {
  data* {
    [DataItem {
      store*
      forecast_date*
      forecast*
    }]
  }
}
```
